

JAKIR HUSSAIN

SENIOR FULL-STACK ENGINEER (FRONTEND-LEANING)

REACT | NEXT.JS | NODE.JS | AI AGENTS | CLOUD & APIS

itsjakirhussain@gmail.com | +971 551419969 | Dubai, UAE | linkedin.com/in/iam-hussain | iam-hussain.site

PROFESSIONAL SUMMARY

Frontend-leaning Senior Full-Stack Engineer with 8+ years of experience building high-performance, scalable web applications using React, Next.js, and TypeScript, backed by Node.js microservices and GraphQL/REST APIs. Proven expertise in frontend architecture, design systems, server-driven UI, and performance optimization for large-scale platforms.

Strong exposure to AI-enabled product development, including agentic workflows, tool calling, and Retrieval-Augmented Generation (RAG) to deliver context-aware experiences with governance, safety, and compliance in enterprise environments.

WORK EXPERIENCE

LEAD – TECHNOLOGY

Synechron Technologies LLC (Client: Emirates NBD)

Dec 2024 – Present

Dubai, UAE

Project: Treasury AI Assistant - Emirates NBD

Led the end-to-end engineering of an enterprise-grade AI assistant combining rich frontend experiences, scalable backend services, and agentic AI workflows to deliver real-time treasury insights within a regulated banking environment.

- Architected and delivered a **full-stack AI assistant platform**, combining React-based dashboards with Node.js backend services and multi-agent LLM orchestration.
- Owned frontend architecture for complex, data-dense treasury interfaces (search, drill-downs, insights), emphasizing performance, accessibility, and usability.
- Designed backend orchestration services in **Node.js and TypeScript** to coordinate agent execution, tool invocation, and deterministic response flows.
- Implemented **agentic AI patterns** using LangChain and LangGraph, enabling tool calling, retries, validation steps, and controlled execution paths.
- Built secure, role-aware UI and API flows integrating LLM responses, backend-calculated metrics, and human-in-the-loop approvals.
- Implemented **RAG pipelines** using vector retrieval to provide context-aware answers while enforcing authorization boundaries and data masking.
- Improved end-to-end latency through caching strategies, selective rendering, and **Redis-backed session memory**.

Technologies & Tools

React.js, Next.js, TypeScript, Node.js, LangChain, LangGraph, Multi-Agent LLM Systems, Agentic AI, RAG, Vector Databases, OpenAI, LLaMA, Claude, Redis, Calypso APIs

Project: Open Finance Platform - Emirates NBD

Owned frontend and backend architecture for a consent-driven Open Finance platform under the UAE Central Bank “**Compete & Comply**” Open Banking framework.

- Led **full-stack architecture** for Open Finance dashboards and APIs, enabling consent-driven data exchange between Licensed Financial Institutions (LFIs) and Third-Party Providers (TPPs).
- Built **React/Next.js** dashboards for onboarding, consent lifecycle, approvals, and audit workflows using reusable component patterns and form abstractions.
- Designed and implemented **Node.js + TypeScript microservices** exposing REST and GraphQL APIs for consent management, validation rules, audit trails, and reporting.
- Standardized API contracts (DTOs, pagination, filtering, error models) to improve frontend reliability, reduce integration defects, and accelerate feature delivery.
- Implemented secure authentication/authorization flows (token validation, scope-based access, role permissions) aligned with banking compliance and Open Banking policies.
- Integrated **API gateway policies** and traffic controls (rate limits, throttling, request validation) to enforce secure, predictable, and compliant API behavior.
- Improved developer experience and release consistency by aligning frontend components, backend schemas, and CI/CD pipelines across teams.

Technologies & Tools

React.js, Next.js, TypeScript, Node.js, REST APIs, GraphQL, Material UI, MongoDB, OpenShift, 3Scale, Docker, Kubernetes, Jenkins, Playwright, Cucumber.js

SKILLS

FRONTEND ENGINEERING

React.js, Next.js
TypeScript, JavaScript
Design Systems & Component Architecture
Server-Driven UI
State Management (Redux Toolkit, React Query)
Performance Optimization
Accessibility (WCAG)

BACK-END & APIS

Node.js, Bun
Express.js, Hapi
REST APIs, GraphQL
Apollo GraphQL, GraphQL Modules
Prisma ORM, Sequelize ORM

AI & LLM ENGINEERING

Agentic AI & Tool Calling
LangChain, LangGraph
RAG, Vector Databases
OpenAI, LLaMA, Claude
Prompt Safety & Guardrails

UI & TOOLING

Tailwind CSS, Material UI
Styled Components
Vite, Webpack, Babel
Storybook
Framer Motion

TESTING & QUALITY

Playwright, Cypress
Jest, Mocha, Chai
Cucumber.js
Vitest

DATA, CACHING & SEARCH

MongoDB, PostgreSQL
MySQL, DynamoDB
Redis
Elasticsearch

CLOUD, DEVOPS & PLATFORM

AWS (Lambda, S3)
Docker, Podman
Kubernetes, OpenShift
Terraform
Jenkins, GitHub Actions

SOFTWARE ENGINEER II

Condé Nast Technology Lab

Jun 2021 – Nov 2024
Bangalore, India

Project: The New Yorker (Caption Contest, AI Personalization, Home, Quizzes & Newsletters)

- Led frontend development for high-traffic editorial surfaces at The New Yorker, powering Caption Contest, personalization modules, quizzes, and newsletters.
- Architected scalable **React and Next.js** applications optimized for performance, SEO, and accessibility across millions of monthly users.
- Drove the design and rollout of a **server-driven UI system**, reducing duplicated frontend layout logic by approximately **40%**.
- Built animation-rich, interaction-heavy experiences such as the **“Name Drop”** quiz with a strong focus on UX polish and performance.
- Implemented frontend analytics instrumentation to support experimentation, personalization feedback loops, and product insights.
- Collaborated closely with design, editorial, and product teams to deliver pixel-perfect, brand-consistent user experiences.

Technologies & Tools

React.js, Next.js, TypeScript, GraphQL, Node.js, Prisma, MongoDB, Kubernetes, Terraform, GitHub Actions, AWS, Datadog, Fastly CDN

SOFTWARE DEVELOPER

HTC Global Services

Feb 2020 – Jun 2021
Chennai, Tamil Nadu, India

Project: Manipal Education and Lead Management

- Built and maintained React-based administrative workflows integrated with microservice **REST APIs**, improving operational efficiency for admissions and lead teams.
- Designed API-driven UI modules for lead capture and tracking, ensuring robust validation, predictable state, and clean UX.
- Implemented serverless data ingestion pipelines using **AWS Lambda, SQS, and DynamoDB**, processing Salesforce lead data approximately **60% faster**.
- Integrated **Elasticsearch** for search and reporting, enabling real-time analytics and improved lead visibility.
- Deployed Dockerized Node.js services on AWS EC2, improving CI/CD reliability and release stability by ~30%.

Technologies & Tools

React.js, Node.js, Express.js, TypeScript, Sequelize, DynamoDB, Elasticsearch, AWS Lambda, SQS, Docker

NODE JS DEVELOPER

Develop Script LLC

Dec 2018 – Jan 2020
Chennai, Tamil Nadu, India

Project: Mazzady, Sothebi, PreRio, SlotCycle

- Built React-based admin and bidding interfaces with real-time updates, optimizing UI responsiveness under high concurrency.
- Implemented real-time auction experiences using **WebSockets (Socket.IO)** with predictable client-side state updates.
- Developed reusable UI patterns for bidding flows, notifications, and item detail surfaces to improve user engagement.
- Integrated payments, logistics, and notifications to deliver end-to-end e-commerce workflows.

Tech Stack

React.js, Node.js, Express.js, Socket.IO, Redis, AWS RDS, MySQL

Load Balancers, CDN

ADDITIONAL EXPERIENCE

Origin Protocol

Frontend Engineer — Remote/Contract
Dec 2020 – Feb 2021

Worked on an Ethereum-based dApp, implementing Web3.js and MetaMask wallet integration. Collaborated on GraphQL API extensions within a Lerna-managed monorepo.

Threado

Frontend Engineer — Remote/Contract
Nov 2021 – Jan 2022

Contributed to a community management web application using TypeScript, React, and Next.js with a component-driven UI approach.

Selsun Technologies

Software Trainee — Chennai, India
Dec 2017 – Nov 2018

Developed computer vision solutions for semi-automated equipment, enhancing OpenCV-based image processing algorithms using C++ and Python.

EDUCATION

Arunai Engineering College

Tiruvannamalai, Tamil Nadu, India
Bachelor of Engineering in Mechanical Engineering
Aug 2013 – Jun 2016

Kumaran Polytechnic College

Tiruvannamalai, Tamil Nadu, India
Diploma in Mechanical Engineering
Aug 2010 – Jun 2013

LANGUAGES

ENGLISH, TAMIL, HINDI
